

Resource Management Policy Update

There was an error in posting the Resource Management Policy adopted on June 10, 2025, by the Presbytery in its Stated Meeting of that date.

The process employed by the Budget Committee included listening sessions that went beyond our deadline for sending out the meeting packet, which included the most recent version (and the one in error placed on our website). The revised version was sent out prior to the June 10 meeting via email and printed copies were provided at the meeting. The work of the presbytery was based upon the final version presented by the sponsoring task force and was passed.

In the days afterwards, the non-revised and revised version existed side by side, and the incorrect one made it to the website. The staff of the Presbytery office sincerely apologizes for the inconvenience that this produced as well as the lengthy time to incorrect version may have been the basis for conversations in this budgeting cycle.

Please know the lessons learned will be put into practice, and the office staff will be sure to seek verification from the various groups that bring business to the presbytery for consideration and actions.

Apologies respectfully offered,

Rev. Kerry Foster, temporary General Presbyter and Stated Clerk
